Subject: Re: RM 10.9 RAWP - Revised

Hi Rob,

EPA has reviewed the revised RM 10.9 RAWP and considers it approved, pending incorporation of the following additional comment:

Language was added to Section 1.2.2 indicating that the LPR, including RM 10.9, is categorized as an SE3 water body and listing the designated uses. This is incorrect. The LPR is actually categorized as FW2-NT/SE2, from Dundee Lake down to the confluence with the 2nd River.

In all FW2 waters the designated uses are:

1. Maintenance, migration and propagation of the natural and established biota;
2. Primary contact recreation;
3. Industrial and agricultural water supply;
4. Public potable water supply after conventional filtration treatment (a series of processes including filtration, flocculation, coagulation, and sedimentation, resulting in substantial particulate removal but no consistent removal of chemical constituents) and disinfection; and
5. Any other reasonable uses.

In all SE2 waters the designated uses are:

1. Maintenance, migration and propagation of the natural and established biota;
2. Migration of diadromous fish;
3. Maintenance of wildlife;
4. Secondary contact recreation; and
5. Any other reasonable uses.

Please replace the language in the RAWP. In addition, consider moving this information to Section 1.2.3, after the language that was added at the start of the section.

Once this comment has been addressed, please submit a final RAWP for our files. As we discussed today, we look forward to receiving the 90% design submittal on or before November 16th.

Thanks,
Stephanie

Subject: RM 10.9 RAWP - Revised

Stephanie:

Attached are the revised RM 10.9 RAWP documents:

RLSO with all comments Word version without figures,

Response to comment table, and

Complete Final Draft in PDF with all figures and Appendices A and B.

The schedule in App B (last page of the PDF) has a note on it that it will be updated upon approval of the RAWP so that we can tie the schedule to a approval/start date.

R/

Rob
